**Taylor
Wimpey**

Assemble & Join is a community based project where any local resident, community group, business or school can come and design and make things for free.

You can learn basic carpentry, make items using a CNC wood router, and design and build things collectively.

Come and make a bird box, a street sign, table tennis bat, a planter for the local area or see your own ideas brought to life!

Assemble & Join is a community initiative project delivered as part of the York Gardens regeneration project.
