

Health and safety at the site questionnaire

If an Inspector will visit the site(s), they will need to know what safety equipment and protective clothing to bring. The following questions indicate the type of information the Inspector will need about the site and any land or building that the Inspector will need to enter. Please supply any additional information on a separate sheet of paper

1. Is the site uneven or does it present any other known risks? Is special footwear or any other Personal Protection Equipment required, and will this be supplied at the site?

The site is not uneven and does not present any known risks. Surfaces around the site are a combination of tarmac, concrete paving and various internal floor surfaces all regularly used by users of the lido and its facilities.
Specific items of P.P.E. are not considered necessary although it is suggested that the Inspector provides him/herself with wellington boots or similar footwear if wet weather conditions prevail at, or immediately before, the time of the visit.

2. Is there any likelihood of exposure to pets or other animals which may present a risk to the safety of the Inspector?

Little or no likelihood within the Lido enclosure. As the Lido is located on open common land it is possible that pet dogs, under the control of their owners/walkers will be present in the area immediately around the Lido enclosure. This presence should not present any risk to the Inspector although it is suggested that the Inspector should be made aware of this potential before the site visit.

3. Is the site remote and/or can it be seen from other occupied buildings/property/public land/roadside?

The site is not immediately overlooked by any other buildings, but is not considered to be "remote" in that it is within 40 metres of a well used public car park and 120 metres from Tooting Bec Road. It should be noted that the Lido is a popular recreational facility which attracts many visitors during the summer season (May to September inclusive)

4. Does the site have a good mobile phone signal or is there easy access to a public telephone should the emergency services be required?

Mobile `phone signal in the area is considered to be good and reliable.

5. Are there any areas that require specialist equipment or training for access – any confined spaces?

No.

6. Are there any dangerous pieces of equipment or substances stored at the location?

None in the areas that are the subject of this application.

7. Is there any likelihood of exposure to chemicals, asbestos, radiation or are there any other risks, requiring the use of Personal Protection Equipment, which may affect the health & safety of the Inspector? (Asbestos is referred to directly as it was present in buildings built before it was banned in 1977).

No. The site is in full use by the public.

8. If there is any other relevant information which the Inspector should be aware of that is not covered in this questionnaire?

All of the facilities that are the subject of this application are located within the Tooting Bec Lido enclosure. The Lido is open everyday from 6am to 8pm from May till September and 7am to 2pm from October to April. Hot days are best avoided, as it can be very busy, except between 2.30- 3.30 when it is closed to the public (staff are on site).

To access the facilities/site the Inspector should be asked to contact the Lido managers Karen Wells at karenwell@pfpleisure.org and Thea Kiley at AletheaKiley@pfpleisure.org to make arrangements for his/her visit
